

# Pink MythOS - Partner Deck

*"The galaxy is watching. Don't be boring."*

---

## The Problem

Every crypto game is the same: deposit, wait, maybe win.  
No skill. No story. No reason to care.

---

## The Solution: Pink MythOS

An **AI-powered narrative survival game** where players face absurd, impossible dilemmas - and stake crypto on their answers.

Think **D&D meets Black Mirror meets Crypto Culture**.

Element	Description
<b>The Shiv</b>	An impossible scenario generated by AI. No right answer.
<b>The Auditors</b>	Three alien overseers (Jinx, Veyra, Granz) who judge your response.
<b>The Stake</b>	SOL or \$PNKO. Winners take a share of the pool.
<b>The Drama</b>	The higher the players -> The fewer winners -> the higher the payout.

---

## The Economics (On-Chain, Transparent)

**Pool Split: 70 / 7 / 15 / 8**

Share	Destination
<b>70%</b>	Winners (paid out on-chain)
<b>7%</b>	Treasury + Governance Partners
<b>15%</b>	Renewal Vault (burn schedule)
<b>8%</b>	Next round buffer

## Power Law Apex Curve

As more players join, **winners drop dramatically** - ROI skyrockets.

Players	Winners	Avg ROI
100	21	<b>3x</b>
1,000	30	<b>23x</b>
5,000	13	<b>269x</b>

10,000	8	<b>875x</b>
100,000	3	<b>23,333x</b>

---

## The Vision

I'm **Anselme Gouanou** - solo founder.

My goal: revive **narrative-based games** (like D&D) and merge them with crypto. Players have fun answering impossible dilemmas. Winners take life-changing payouts.

### Endgame: Full Automation

The **7% Treasury** (split among 3 partners) funds the path to:

- **AI Shiv Generation** - no manual content creation
- **AI Image Generation** - every Shiv gets custom visuals
- **AI Moderation** - no active admin intervention
- **Self-sustaining system** that runs 24/7 without me

---

## The Ask

I'm forming the **3 Governance Slots** - strategic partners who split the 7% treasury:

1. Understand Solana culture + degenerate economics
2. Want board-level alignment, not a quick flip
3. Can amplify the launch (KOLs, communities, capital, liquidity)

### What you get:

- OTC allocation at ground-floor terms
- Direct governance influence
- Treasury-side alignment (you win when the house wins)
